will speak on

**The Ethical Statistician**

**Time: 3:00 – 4:00 PM**

**Date: Friday, March 7, 2008**

**Place: Tuttleman Learning Center 304**

### Abstract

Ethics are the principles we live and conduct our work by. They are our Values in Action. Most large organizations have an ethical code that they expect all of their employees to comply with in their work. There are many rules, laws and resources available to everyone to promote ethical behavior. Statisticians must be especially diligent because we handle large amounts of data that important decisions are made upon, and the general public does not understand our very technical methodology. It is imperative that we, as statisticians, maintain public trust and credibility.
