Join us for an informational workshop that will introduce participants to the different types of environmental funding opportunities available in the state of Pennsylvania to "green" their business through the Environmental Management Assistance Program.

Every small business has opportunities available to improve their operations through green business practices. Taking steps to reduce carbon emissions and pollution, increasing energy efficiency and producing an enhanced product or service can all help increase profits. The Environmental Management Assistance Program (EMAP) has created a holistic "Building Block" approach to greening your business, from energy savings to compliance issues to purchasing and recycling.
